Product name 1 year fixed rate bond – issue 155

What is the interest rate?

Rates effective 06 December 2024		
Annual interest gross p.a.*	Monthly interest gross p.a.*	AER*
4.65%	4.55%	4.65%

*Gross p.a. is the rate of interest paid without the deduction of tax per annum. Please note that the automatic deduction of tax on savings interest ceased with effect from 6 April 2016. AER stands for Annual Equivalent Rate and illustrates what the interest rate would be if interest was paid and compounded once each year. As every advertisement for a savings product will contain an AER you will be able to compare more easily what return you can expect from your savings over time.

Where interest is payable, interest is calculated daily and can be credited to the account or transferred to your nominated account. Monthly interest is calculated on the basis that each month last 30.416 days (365 days divided by 12 months). Where payable, annual interest is paid on maturity. Where payable, monthly interest is paid on the last working day of each month. Where payable, the final interest payment will be made on the maturity date. You can choose to have your interest paid into this account or your nominated account. Whether and when you pay tax on the interest earned is dependent on your own personal circumstances, the product you have chosen and the method in which the interest is paid.

Can Kent Reliance change the interest rate?
